DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Kitano et al. (US 6,569,950).

The reference discloses a modified polypropylene resin comprising melt kneading (A) 100 parts resin, (B) 0.1-20 parts of unsaturated carboxylic acid or derivative, and (C) 0.01 to 20 parts organic peroxide (col. 2, lines 26-62). The working examples contain all limitations of claims 1, 2 and 4 except for the use of a component (B) within the claimed scope. However, preferred embodiments of component (B) are stated to be glycidyl acrylate and glycidyl methacrylate (among a total of only three named preferred species (col. 4, lines 12-14), and such clear disclosure is anticipatory within the meaning of 35 USC 102. Instant claims 1, 2 and 4 have merely selected an alternative preferred species which is specifically named in the reference. Regarding claim 3, the reference has recommended the inclusion of styrene at col. 5, lines 31-33,

and the ordinary skilled worker would immediately envisage such use with at least the most highly preferred embodiments of the process.
